         3.2.3.3 Application requirements

4 DFF ASSESSMENT AND ASSESSMENT CRITERIA

5 GENERAL APPLICATION REQUIREMENTS
   5.1 Language and applicant requirements
      5.1.1 Language
      5.1.2 Applicant’s qualifications
      5.1.3 Other requirements for applicant
      5.1.4 Who should submit the application
   5.2 Application form
      5.2.1 Special fields that must be completed in the application form in e-grant
         5.2.1.1 Popularised scientific description and abstract
         5.2.1.2 Listing the relevant Fields of Science classification code(s) for the project
5.3 Overview of appendices to the application

5.3.1 Project description
5.3.2 Curriculum Vitae – CV
5.3.3 Extension of PhD age
5.3.4 List of publications
5.3.5 Budget
  5.3.5.1 Entering budget information in the application form
  5.3.5.2 Preparing the budget
  5.3.5.3 Co-financing and funding from other sources
  5.3.5.4 Which research expenses can you apply for?
  5.3.5.5 Scientific/academic salaries
  5.3.5.6 Technical/administrative salaries
  5.3.5.7 Equipment (purchase or construction)
  5.3.5.8 Operating expenses
  5.3.5.9 Particular conditions for private enterprises
  5.3.5.10 Overhead/administration expenses
  5.3.5.11 The principle for calculating differentiated overhead/administration expenses
5.3.6 Budget confirmation

6 HOW IS THE APPLICATION PROCESSED AND ASSESSED?
6.1 Requirements for your application to be given active consideration
6.2 How to apply for more instruments and more thematic research areas
6.3 Independent Research Fund Denmark’s processing procedures
6.4 when and how will you be notified of DFF’s decision?

7 YOUR RESPONSIBILITY AS AN APPLICANT
7.1 Technical disclaimer
7.2 The danish open administration act and the danish public administration act
7.3 Data protection act
7.4 Authorities’ right to request other information
7.5 Publication

8 SUPPORT FOR YOUR APPLICATION
8.1 Questions about the application procedure
8.2 Technical questions (e-grant)
8.3 Questions about existing grants
FRAMEWORK FOR INDEPENDENT RESEARCH FUND DENMARK’S SUPPORT FOR RESEARCH

The main tasks of Independent Research Fund Denmark are to provide financial support to concrete and fixed-term research activities based on researchers’ own ideas. DFF considers it to be the fund’s primary task to support the growth layer and the continued development within independent, researcher-initiated research. DFF puts decisive weight on the scientific research quality being maintained in the projects it supports.

The 2017 legislation introduced the possibility of DFF to award grants to concrete research activities within politically determined themes or instruments, when special funding has been provided for this purpose in the National Budget. The present call for proposals is a consequence of this opportunity.

This document is a translation into English of the fund’s Danish Call for Proposals. In case of any inconsistencies between the two versions, the information in the Danish version applies.

1.1 INTERNATIONALISATION
DFF wants to strengthen and further develop the internationalisation of Danish research and therefore encourages applicants to submit applications encompassing international activities. The objective is to give the best researchers and research groups the opportunity to coordinate and develop their cross-border research collaboration, and to give talented researchers the opportunity to spend part of their research career abroad. Aspects of internationalisation can therefore figure in applications to all of DFF’s instruments. In any case, the applications must be related to the international state of the art within their area.

1.2 GENDER BALANCE
DFF also wants to support a balanced development of management resources for both genders at Danish research institutions and would like to see this taken into consideration in applications to DFF. Therefore, DFF recommends that applications as far as possible demonstrate an approach to scientific practice that can act as an incubator for professional diversity and equal opportunities for male and female researchers. For applications seeking support for research groups or similar collaborative projects, the applicant should in the application account for his/her considerations for the gender make-up of the research group or collaborative team. A statement of this is a requirement, but the actual gender make-up of the group will not factor into the assessment of the application. The required statement has been introduced to ensure the applicant’s focus on contributing to equal opportunities for men and women in research.

1.3 OPEN ACCESS
DFF finds it important to strengthen the societal effect of research by ensuring unrestricted and cost free digital access to all the latest research results in scientific articles. Therefore, Independent Research Fund Denmark, the Danish National Research Foundation, and Innovation Fund Denmark adopted the “Open Access Policy for public research funds and foundations” in April 2019, which requires parallel publishing of published scientific articles resulting from full or partial funding from these foundations. DFF however does not provide financial support for open access publishing as the fund allows for a quarantine period of 6-12 months. Further information on DFF’s Open Access policy can be found on DFF’s website.
1.4 RESEARCH INTEGRITY
DFF expects that grant recipients will follow the Danish Code of Conduct for Research Integrity.

1.5 POLITICALLY DETERMINED THEMES IN INDEPENDENT RESEARCH FUND DENMARK
As part of the political agreement of 6 November 2019 on the distribution of the research reserve in 2020, DFF has been given the task of allocating funds to thematic research.

This call concerns the thematic research that DFF will support in 2020 within the politically determined areas as described in “Agreement between the Danish Government, the Liberal Party, the Social Liberal Party, the Danish People’s Party, the Socialist People’s Party, the Red-Green Alliance, the Conservative Party, the Alternative, the New Right, and Liberal Alliance about: Distribution of the research reserve (including proceeds from reform of the disability pension and flex-job of June 2012) together with other research priorities in 2020”.

2 THEMATIC RESEARCH AREAS IN INDEPENDENT RESEARCH FUND DENMARK IN 2020
Independent Research Fund Denmark will grant funding for thematic research within the following areas:

- Green Transition
- Effects of Early Intervention
- Work on Development of the Economic Modelling Principles

The following describes application deadlines, within which areas thematic research is funded, instruments, assessment criteria and general requirements as well as procedures, etc.

2.1 APPLICATION DEADLINES
All applications must be uploaded in the application system www.e-grant.dk no later than Thursday June 11 2020 at 12:00 (noon).

2.2 GREEN TRANSITION
DKK 335 million have been allocated to the research area Green Transition.

To allocate the funds, DFF’s Board of Directors has established an expert committee:

DFF | Thematic research - Green Transition (2020)

The Board of Independent Research Fund Denmark may decide to allocate part of the announced funds to international research cooperation. Thus, the stated amount of DKK 335 million may be reduced in connection with the committee’s final decision on the allocation of funds.

Research on Green Transition will promote researchers’ own original ideas, which can contribute to the green transition, including solutions that address the climate and nature challenges. The grants will strengthen the growth layer of researchers, build up capacity in research environments, and contribute to new groundbreaking research within green transition.
2.3 EFFECTS OF EARLY INTERVENTION
DKK 20.7 million have been allocated to the research area Effects of Early Intervention.

To allocate the funds, DFF’s Board of Directors has established an expert committee:

_DFF | Thematic research - Effects of Early Intervention (2020)_

Research on early intervention must among other things, contribute to documenting the impact of various types of early and preventive interventions that can support the well-being, development, and learning of children and young people. At the same time, there is a need for application-oriented research that can qualify knowledge about the effect of various early and preventive efforts and thereby support that all children and young people are given the opportunity to realise their full potential. It is a priority that the research also involves the practice-oriented research environments. Further, the research must - and in addition to the efforts financed in the November 2018 agreement on the special pool for the social area (Satspuljeaftalen) - where relevant, qualify the applicability of the social economy investment model (Den Socialøkonomiske Investeringsmodel (SØM)).

2.4 WORK ON DEVELOPMENT OF THE ECONOMIC MODELLING PRINCIPLES
DKK 29.5 million, which have been allocated to the research area Work on Development of the Economic Modelling Principles, are allocated in the following way: DKK 14.75 million to 1) welfare investments, and DKK 14.75 million to 2) climate, nature, and environment.

_DFF | Social Sciences will allocate the funds for this theme_

Research into the work on Development of the Economic Modelling Principles must shed light on the socio-economic effects of 1) welfare investments, and 2) climate, nature, and environment. It is thus necessary to examine whether new knowledge provides a scientific basis for further developing the economic models and calculation principles.

Please note that Independent Research Fund Denmark has decided that the funding can be granted to one or up to three research projects within each area. Therefore, applications can be submitted for research projects up to DKK 14.75 million, including overhead, i.e. projects exceeding the amount limit for a DFF-Research Project2.

3 START DATE, INSTRUMENTS, AND GRANT AMOUNTS

3.1 START DATE FOR PROJECTS
DFF does not provide retroactive funding. You can therefore not apply for research funding for activities that have already taken place by the time DFF makes its decision.

The earliest start date is 1 January 2021 and the latest is 1 August 2021.

3.2 INSTRUMENTS, WHICH CAN BE APPLIED FOR UNDER THEMATIC RESEARCH 2020

3.2.1 DFF-Research Projekt1 (thematic)

3.2.1.1 Objective
To advance the quality of Danish research, DFF offers funding for research projects within an economic framework of up to DKK 2 million, excluding overhead. A DFF-Research Projekt1 is characterised
by being a clear and well-defined research question, where the research activities are expected to be of a high international quality. A DFF-Research Project is typically 3 years, but it is possible to apply for a 4-year project if a PhD student is involved in the project.

3.2.1.2 Applicant requirements
The applicant must be able to document independent research experience typically corresponding to 3 years of research or more after having obtained a PhD (or similar qualifications). The applicant’s previous results will be assessed in relation to his/her career, and in relation to the scientific challenges of the project applied for. If the applicant is not an associate professor, and has not obtained a positive associate professor assessment (“lektorbedømmelse”) and the project involves education of researchers, it must be stated in the application how the relevant supervision will be provided, and how the scientific connection of the research students to the project will be ensured.

3.2.1.3 Application requirements
DFF attaches importance to the project description containing a description of any sub-projects, including PhD and postdoctoral projects. The applicant can apply for funding for PhD and postdoctoral scholarships if they have a clear independent function within, and form an integral part of, the research project.

Postdoctoral candidates must have obtained their PhD or achieved equivalent qualifications (e.g. a positive assistant professorship evaluation ("adjunktbedømmelse") within the last four years at the time of the application deadline (see Section 5.3.3 for calculation of the PhD age in relation to maternity leave, etc.). When applying for research funding for PhD scholarships, there must be a sufficiently balanced relationship between the contribution of senior researchers and PhD scholars to the project, so that all registered participants have a concrete role in the project work.

An account for the proposed recruitment process must be provided, if the application includes requests for funding of unnamed PhD students and/or unnamed postdoctoral participants.

The project description must not exceed 5 A4 pages including figures, tables, etc., but excluding references/bibliography (see section 5.3.1). Please note the table in section 5.3, which provides an overview of which appendices are mandatory to attach.

3.2.2 DFF-Research Project2 (thematic)

3.2.2.1 Objective
To advance the quality of, and develop collaboration within, Danish research, DFF offers funding for research projects carried out by multiple researchers (including postdoctoral candidates and PhD students) of up to 4.5 years in duration, within an economic framework of DKK 2 million -4.3 million, excluding overhead.

A DFF-Research Project2 is often characterised by a coordinated and mutually binding collaboration featuring a well-defined, joint research question. However, it may also be a project formulated by a single researcher, which is to be carried out in a research team, when it can be argued that the project is particularly ambitious and resource demanding, and that the research objective cannot be obtained through a DFF-Research Project1. The research activities must have the potential to create synergy among any sub-projects, involve an international level of collaboration (if relevant) and be of a high international standard.
3.2.2.2 Applicant requirements
The applicant must be able to document considerable, independent research experience at a high, international level typically corresponding to 5 years of research or more after having obtained a PhD (or similar qualifications). The applicant’s previous results will be assessed in relation to his/her career, and in relation to the scientific challenges of the project applied for. If the applicant is not an associate professor and has not obtained a positive associate professor assessment (“lektorbedømmelse”), and the project involves education of researchers, it must be stated in the application how the relevant supervision will be provided, and how the scientific connection of the research students to the project will be ensured.

3.2.2.3 Application requirements
DFF attaches importance to the project description accounting for the synergy between any sub-projects, the project management and organisational structure, as well as plans for publishing results. All sub-projects, including PhD and postdoctoral projects, should be described in the project description. The applicant can apply for funding for PhD and postdoctoral scholarships, if they have a clear independent function within, and form an integral part of, the research project.

Postdoctoral candidates must have obtained their PhD or achieved equivalent qualifications e.g. a positive assistant professorship evaluation (“adjunktbedømmelse”) within the last four years at the time of the application deadline (see Section 5.3.3 for calculation of the PhD age in relation to maternity leave, etc.). When applying for research funding for PhD scholarships, there must be a sufficiently balanced relationship between the contribution of senior researchers and PhD scholars to the project, so that all registered participants have a concrete role in the project work.

An account for the proposed recruitment process must be provided, if the application includes requests for funding of unnamed PhD students and/or unnamed postdoctoral participants.

The project description must not exceed 7 A4 pages including figures, tables, etc., but excluding references/bibliography (see section 5.3.1). Please note the table in section 5.3, which provides an overview of which appendices are mandatory to attach.

3.2.3 DFF-Research Project3 (thematic)

This instrument can only be applied for within the research theme ”Green Transition”.

3.2.3.1 Objective
In order to strengthen the quality, and to develop the level of research collaboration within Danish research, DFF offers funding for research projects to be carried out by groups of researchers (including PhDs and postdoctoral candidates) within a framework of DKK 4,300,000 – 8,300,000, excl. overhead.

The activities of a DFF–Research Project3 can be characterised as coherent and focused research initiatives, whose purpose is to strengthen or develop research fields with specific Danish potential and competencies. Thus a DFF–Research Project3 may be comprised of several subprojects, each with a clear and well-defined problem statement that is being investigated jointly by several researchers, e.g. as a research consortium, and preferably drawing on various research traditions and disciplines.

There must be synergy between the sub-projects, a level of international collaboration, and the activities must represent research of a high international quality.
3.2.3.2 Applicant requirements
As applicant you must be an internationally recognised researcher, typically at professor level, with documented original research and experience with research management. Your previous results will be assessed in relation to your career, and in relation to the scientific challenges of the project applied for.

3.2.3.3 Application requirements
DFF emphasises that the project description should account for the synergy between any sub-projects, the project management and organisational structure, as well as plans for publishing results. All sub-projects, including PhD and postdoctoral projects, should be described within the project description. You can apply for funding for PhD and postdoctoral scholarships, if they have a clear independent function within, and form an integral part of, the research project.

Postdoctoral candidates must have obtained their PhD or achieved equivalent qualifications (e.g. a positive assistant professorship evaluation “adjunktbedømmelse”) within the last four years at the time of the application deadline (see Section 5.3.3 for calculation of the PhD age in relation to maternity leave, etc.). When applying for research funding for PhD scholarships, there must be a sufficiently balanced relationship between the contribution of senior researchers and PhD scholars to the project, so that all registered participants have a concrete role in the project work.

An account for the proposed recruitment process must be provided if the application includes requests for funding of unnamed PhD students and/or unnamed postdoctoral participants.

The project description must not exceed 7 A4 pages including figures, tables, etc., and excluding references/bibliography (see section 5.3.1). Please note the table in section 5.3, which provides an overview of which appendices are mandatory to attach.

4 DFF ASSESSMENT AND ASSESSMENT CRITERIA
In the assessment of the application, DFF will take the criteria below into account. Besides requiring the application to be within the framework of the thematic areas, the project’s quality and the applicant’s qualifications are the two most significant assessment criteria.

DFF emphasises as part of the assessment, that the individual criteria should be met to the greatest extent possible. For the individual expert committee or council there will always be a concrete, overall evaluation, where individual criteria can be fulfilled to a greater or lesser extent. Thus, not all criteria will be relevant to all applications. Because of the competition between applications, it is not a given that meeting the criteria will result in a grant.

In every case, DFF will assess an application based on whether the project in question benefits Danish research.

For instruments in this thematic call, DFF is using the following criteria:

**Compliance with the objective of the instrument:**
- Are the described objectives of the instrument, (see section 3) sufficiently met?

**Scientific quality:**
- Does the project description document that the project contains potential for scientific progress, innovation and originality (theoretical, methodical and empirical)?
- Does it display innovative research as opposed to expanding on already ongoing research?
• Does the project description document that the project contributes to internationalisation of Danish research?

• Does the project description contain
  - A clear and defined research question and objective?
  - A description of state of the art and/or the scientific challenges within the project’s research area, and the project’s potential contribution to this?
  - Consistent and suitable hypotheses?
  - An account of the theoretical and/or methodical foundation, including an argumentation for the relevance of the proposed activities in relation to this foundation?

• If relevant to the project: Is there an argument for the correlation between the project’s hypothesis, theory and method?

• If relevant to the project: Is there a sufficient description of the project’s empirical material or data foundation, including any pilot projects and/or any preliminary data?

• If relevant: Is there sufficient synergy between the individual parts of the project?

Applicant’s qualifications:

• Has the applicant documented
  - Scientific qualifications to an extent that is necessary for the project’s completion?
  - Experience of scientific production to an extent that is necessary for the project’s completion?
  - Qualifications as a research leader to an extent that is necessary for the project’s completion?

• Have the other central project participants documented scientific qualifications to an extent that is necessary for the project’s completion?

• Are relevant local and international researchers contributing, and if relevant, is there sufficient contribution from public institutions or business partners?

• Is there a strategy for the organisation and management of the project, including an account of the division of labour between the researchers involved and a plausibility of the applicant being able to handle the project applied for at the same time as the applicant’s other research and management tasks?

• Are potential PhD students or postdoctoral candidates an integral part of the project, and do they have a clear function in it?

Feasibility:

• Have sufficient resources been allocated to the project, including the research framework, personnel, and access to necessary facilities and equipment?

• Has a realistic work plan and time schedule been presented for the project, which also takes the recruitment of any unnamed participants into account, as well as the dissemination of the project’s results?

• Does the project description account for the project’s milestones and success criteria, and are these realistic?

• Is there proportionality between the project’s costs and the expected scientific output?

• Is there proportionality between the proposed activities and the proposed budget? Does this include a good correlation between what the requested funding will finance, how the funding will be used, as well as which tasks and people will be financed?

• Are potential ethical aspects satisfactorily described where relevant?

Publishing and dissemination of results:

• Are the collective considerations for the publishing/disseminating/patenting of the project’s results described in a satisfactory manner?

• If relevant: Have the likelihood and plans for patents in the proposed project been accounted for?
Other:
• Do the activities benefit Danish research?
• Does the project/activity include education of researchers in a relevant manner?
• Does the project/activity contribute to improving researcher mobility nationally/internationally and – if relevant – between research institutions/companies?

5

GENERAL APPLICATION REQUIREMENTS

5.1 LANGUAGE AND APPLICANT REQUIREMENTS

5.1.1 Language
The application must be written in English. Attached appendices in other languages will not be considered in the application process.

5.1.2 Applicantant’s qualifications
As a minimum, you must have obtained a PhD degree or equivalent qualifications in order to be able to apply for funds from DFF.

5.1.3 Other requirements for applicant
DFF has the objective of advancing and strengthening Danish research, understood in a broad sense. Therefore, DFF has no requirements as to applicants’ citizenship, the location of research institutions or the specific geographic location, where the research activities in question will be carried out.

DFF does not require a prior employment for the applicant to be able to apply and achieve grants.

DFF sees diversity as a resource, and encourages all candidates – regardless of their gender, religion, ethnicity, or political persuasion – to apply.

DFF does not accept applications from applicants, who in the two years prior to sending an application, have been found guilty of research misconduct by the Danish Committee on Research Misconduct, cf. Act 383 of 26 April 2017 on research misconduct, etc.

5.1.4 Who should submit the application
The application must be submitted by the researcher responsible for the project and responsible to DFF in relation to the submitted project (main applicant).

5.2 APPLICATION FORM
When you have determined the most appropriate instrument for your research idea, and you meet the requirements in the Call for Proposals, you should begin preparing your application to DFF. Applications must be sent through the e-grant website www.e-grant.dk.

To submit an application to DFF, you must first register as a user on e-grant. To access the application form, choose which thematic area you wish to apply for.). After you have chosen the appropriate thematic area you can choose the funding instrument you wish to apply for.

To fill in the application form, you have to go through a series of steps/sections, where you must provide various types of information in relation to your application. These steps vary depending on, which instrument you are applying for. You should therefore open the application form as early as possible to get an overview of which information will be needed for the form.
You have the opportunity to reopen and resubmit your application until deadline. If you already have submitted the application and afterwards make changes, which you do not resubmit, DFF will only take the latest version of your application submitted before deadline into consideration.

5.2.1 Special fields that must be completed in the application form in e-grant

In the table below an overview is given of major fields that must be completed in the application form in e-grant. The table is not an exhaustive list over fields that must be completed in the application form. *The indicated characters are incl. spacing.*

<table>
<thead>
<tr>
<th><strong>Applicant</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Account of your most significant contributions to science (1000 characters)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Title and scientific content</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Brief scientific summary in English (max 1000 characters)</td>
</tr>
<tr>
<td>• Popularised description of the scientific content in Danish (max 1500 characters) (see section 5.2.1.1)</td>
</tr>
<tr>
<td>• Scientific keywords that best describe the research content (min. 1, max 5)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Ethical issues and gathering data</strong></th>
</tr>
</thead>
</table>
| • Ethical issues: Does your research include animal testing, human participation or human biological material, other?  
  If yes: Provide a brief explanation of the ethical issues involved and how they will be dealt with appropriately (max 600 characters)  
  If other: Description of issue (max 200 characters) |
| • Does your project involve gathering or purchase of quantitative data within the research areas of social sciences, medical sciences or the humanities?  
  If yes: Brief description of the data gathered or purchased (max 300 characters) |

<table>
<thead>
<tr>
<th><strong>Gender composition</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Description of the gender composition in the project (max 1000 characters) (see section 1)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Other applications etc.</strong></th>
</tr>
</thead>
</table>
| • Is this application a resubmission?  
  If yes: Title, year of application, case number, describe any changes made (1000 characters)  
  • Have you applied for funding activities covered by this application from other sources? |

<table>
<thead>
<tr>
<th><strong>Previous grants</strong></th>
</tr>
</thead>
</table>
| • Have you as a PI within the last 5 years received any funding over 1 mil. from DFF or other sources for the activities related to the present application?  
  If yes: Specify grant over 1 mil. (max 10). Describe the results of the grant and the grant’s relation to the proposed project (max 1000 characters)  
  • Have you as a PI within the last 5 years received any funding over 1 mil. from DFF or other sources for the activities not related to the present application?  
  If yes: Specify grant over 1 mil. (max 10). Describe the results of the grant and the grant’s relation to the proposed project (max 1000 characters)  
  • Describe the scientific and management aspects of the project, if you have received a grant from other sources |

<table>
<thead>
<tr>
<th><strong>Excluding reviewers</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Explain why the named researcher should not review your application (max 500 characters)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Supplementary information</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Additional information regarding the application (max 1000 characters)</td>
</tr>
</tbody>
</table>

5.2.1.1 Popularised scientific description and abstract

In the application form, you must write a popularised description in Danish and a scientific abstract in English.

The popularised scientific description in the “Title and scientific content” section of the application form should be written with a view to publication, e.g. in the Danish media. It should therefore be written in a way that makes the project accessible and understandable to a non-research audience.

The scientific abstract must be written in English, and written with research peers, who will evaluate the application, in mind. It should therefore be written in a way that makes it clear to research peers, if they are qualified to evaluate the project.
5.2.1.2 Listing the relevant Fields of Science classification code(s) for the project
In the "Title and scientific content" section of the application form, you must list up to 5 Fields of Science classification codes (OECD Classification Codes) in order of priority, according to the scientific fields, which are most relevant to your project. You must use the scientific codes on "Level 2" or "Level 3" from the subdivision provided in the DFF overview of scientific codes, which you will find here. The codes are used for e.g. identifying relevant reviewers for your application, so it is important that you exercise caution when selecting the codes.

You also have the opportunity to list up to 5 keywords of your choosing, that describe the scientific content of your project.

5.3 OVERVIEW OF APPENDICES TO THE APPLICATION
There are a number of mandatory appendices that must be attached to the application and optional appendices that may be attached. The overview below includes the relevant appendices. Appendices, which do not appear in the overview, will not be considered in the assessment process.

You should also pay attention to special conditions as listed in the descriptions of individual instruments in Section 2. In the section after the Appendix overview, you can read more about the individual appendices.

Appendices marked with an X are always mandatory. Appendices marked with * can be mandatory if the conditions listed are applicable to the application.

**Please note:** In order for the applications to be subsequently filed by the Danish National Archives, the submitted appendices either must meet the requirements of, or can be converted to, the PDF/A-1b standard as a minimum.

### Appendix overview

Appendix overview

| B61: Documentation for the salary level of the applicant and any named participants, if the salary level is different from the collective agreement. | * |
| B62: Documentation for the sub-contractor costs. | * |
| B63: De minimis declarations (see Section 5.3.5.9). | * |
| B90: Budget confirmation. Employer institution’s confirmation of budget and hosting in the DFF budget signatory template (see Section 5.3.6). | X |

5.3.1 Project description

The application must always include a project description. The applicant must use the DFF project description template, which is available at www.dff.dk/en/application/forms-for-application. The project description must not exceed the maximum number of pages (excluding references/bibliography) as outlined under each funding instrument - no matter whether the description includes figures or not. The applicant must use the font Times New Roman, font size 12, at least 2 cm margin on the left, right, top and bottom, and line spacing of 1.5. DFF’s project description template meets these requirements. In tables and figure texts, font size 10 and line spacing 1.0 may be used.

In the “Confirmation” section of the application form, the applicant must confirm that he/she has used the project description template, and has not exceeded the maximum number of allowed pages, before the application can be submitted. The councils will not consider any part of the project description that exceeds the given size requirements.

The applicant’s project description must account for:

- The project’s objective, including research question and potential hypotheses.
- The project’s scientific and potential societal perspectives and relevance. In addition, it must include an assessment of the anticipated effect of the project results in relation to future research and researcher education in the field.
- The theoretical foundation of the project, its central concepts and the current knowledge/state of the art within the area. This must include an account of how your project relates to national and international research, its clear delimitations in relation to current activities in the area, as well as an argumentation for your qualifications and previous achievements in the field.
- If relevant to the application: A substantiation of the choice of method, including how theory and concepts will be used for the analysis.
- If relevant to the application: An account of the project’s empirical material.
- A research plan, including an assessment of the feasibility of the project, a work plan and time schedule. It is important that the overall time schedule takes any recruitment of unnamed participants into consideration, as a project extension cannot normally be expected under the terms of the grant.
- The practical framework for the completion of the project (e.g. experimental facilities, staff resources and access to software/databases, etc.).
- Considerations for publishing and dissemination of research results.

When writing your project description, you must also bear in mind that all the members of the council you apply to will participate in the final assessment and prioritisation of the individual applications. Thus, the project description should be understandable to all members of the committee and council.

5.3.2 Curriculum Vitae – CV

All applications must include a CV (maximum 2 A4 pages) and a list of publications for the applicant as a minimum. In addition, a brief CV (maximum 1 A4 page) and list of publications for other key participants may be included.
The required structure of the CV and publication list is applicable to the applicant, researchers/academicians, and other named scientific participants.

The CV must include the following:
- Personal data: name, address, etc.
- Education (for academic degrees, list the date and year of obtaining the degree).
- Current and most recent employment. In case of temporary employment, state the termination date of the employment contract.
- Any periods of leave (e.g. maternity/parental, illness, family care leave, military service, humanitarian aid work, etc.) For periods of leave, indicate the cause and state precisely the starting date and end date of the leave period.
- Other scientific qualifications.
- Academic awards and honours.
- Management experience, including experience with project management and leading research projects.
- Scientific focus areas.
- International relations.
- Supervision of students (PhD students and postdoctoral candidates).

When assessing applicants’ research productivity, the applicants’ individual careers will be taken into account. This includes any leaves of absence or employment in private research-driven businesses.

DFF considers a high ranking in the international competitions of the European Research Council (ERC) to be important information in relation to the CV. Applicants who have qualified for the second round in ERC’s international competitions are therefore encouraged to state this in their CV.

5.3.3 Extension of PhD age
Consideration will be given to leaves of absence such as maternity/paternity or parental leave, illness, family care, military service, humanitarian aid work, etc.

For applicants who have been on maternity/paternity or parental leave after obtaining their PhD, the age of their PhD degree will be extended by calculating the actual number of weeks of leave and multiplying that by 2. The exact period of the maternity/paternity or parental leave, with start date and end date, must be stated in the applicant’s CV.

Moreover, consideration will be given in cases of significant career-relevant circumstances – such as clinical stays or similar – that can be considered a necessary step in a career path, but where there has been limited time for research.

5.3.4 List of publications
The list of publications must only include research that has been published or accepted for publication. The name of the applicant/other (research/academic) participants must be in bold font in the list of publications. The order of authors must be indicated exactly as listed in the original publication, i.e. for example that the order of shared first authorships should not be revised from the original. Likewise all co-authors must as far as possible be mentioned.

The list of publications must be systematically organised, e.g. chronologically and divided into the following categories:
- Peer-reviewed publications (preferably list all authors – including the order they are mentioned e.g. alphabetically or first-to-last author, year of publication, title, place of publication, volume
number as well as first and last page number, or article number and number of pages):
1. articles
2. monographs
3. peer-reviewed articles published in conference proceedings
4. book chapters
• Non peer-reviewed publications such as monographs, book chapters, etc. (preferably list all authors – including the order they are mentioned e.g. alphabetically or first-to-last author, year of publication, title, place of publication, volume number as well as first and last page number, or article number and number of pages).
• Patent references for patents obtained or applied for, which are relevant to your research. Any patent references should be included in the list of publications on equal terms with references for scientific articles.

The applicant must mark BFI level or impact factor for the most important works/patents/contributions in his/her list.

If you list your H-index in your list of publications, you must state how you have calculated it.

5.3.5 Budget
For your application to be considered by DFF, you must prepare a budget for the entire project period, which describes the activities to be funded. This applies both to the funding of activities at your own institution and to any funding, which will go towards participants at other institutions. It is important that the budget includes information about all participants in the project. This also includes participants, who will not receive DFF funding, thus providing an overview of the entire group of participants and the economy of the project.

You as the applicant must fill in DFF’s mandatory budget template for the relevant funding instrument. The correct budget template can be found by registering an application for the selected instrument in e-grant, after which the budget template can be downloaded under the “Upload Budget” step in the application form. There you will find the correct template, which should be completed and uploaded to the application.

5.3.5.1 Entering budget information in the application form
Start by preparing a complete and comprehensive budget using the budget template, which can be downloaded in the e-application form as described in Section 5.3.5. The budget template is only available in English. When the budget is completed, it must be uploaded to the application form in e-grant under the “Upload Budget” option. Please see “Introduction” in the application form for more details on how to upload the template.

5.3.5.2 Preparing the budget
DFF recommends that you seek assistance from the institution responsible for administering the potential grant, when preparing your budget.

You must complete the budget template with the relevant information.

Please pay attention to the following:
• A certain number of sections in the budget template can only be filled in by selecting a value from the drop-down menu.
  - If your institution does not appear in the dropdown menu, please enter it yourself.
  - If there is a need to add more applicant institutions to the budget than there is room for, please contact the e-grant unit, who can help you (see section 8).
• All expenses must be provided, excluding overhead/administrative costs. The overhead amount is automatically calculated from the selected “Overhead percentage”.
• For each budget item you must meticulously explain the amount and relevance. It is especially important that you carefully state and explain the number of months and salary levels for scientific/academic as well as technical/administrative employees. This explanatory information should be entered into the “Description” field.
• When the budget is complete, please ensure that the same person who approves the budget (on behalf of your institution/organisation/company) indicates his/her approval by using the template “Independent Research Fund Denmark – Budget confirmation”, which should be attached as a separate appendix. Please follow the guidelines in Section 5.3.6.

Use one row for every budget entry. If there are not enough rows, related budget entries may be combined into the same budget entry.

5.3.5.3 Co-financing and funding from other sources
DFF may require Danish state research institutions participating in the application to co-finance the project with a total of up to 10% of the amount applied for from the fund. In addition, DFF may require co-financing from other types of institutions, to the extent the council deems appropriate. In connection with this call, DFF has decided not to make co-financing a requirement.

Any co-financing from your own or other participating institutions must be accounted for in the budget under “Co-financing” (green cells).

Any co-financing to the project from sources not actively participating in the project (e.g. other funds), must be accounted for in the budget under “Funding from other sources” (orange cells).

Co-financing in the main must be divided into 4 overall budget items: Scientific/academic salaries, technical/administrative salaries, equipment expenses, and operating expenses as described in Section 5.3.5.4. Information about co-financing may also be listed, even if it stems from a participant, who is not funded by the grant, but is actively participating in the proposed project.

5.3.5.4 Which research expenses can you apply for?
You may apply for funding to cover all expenses directly attributable to the project, and which are relevant and necessary in order to carry out the project. Overhead/administration expenses should be added to this, see Section 5.3.5.10.

The budget must, as a general rule, be divided into the following overall budget items:
• Scientific/academic salaries
• Technical/administrative salaries
• Equipment expenses (exceeding DKK 500,000 excluding overhead/administration expenses)
• Operating expenses (including equipment expenses up to DKK 500,000 excluding overhead/administration expenses)
• Overhead/administration expenses (calculation based on the overhead percentage)

You must prepare the budget according to the actual cost level at the time of the application, and take into account expected salary and price increases during the project period.

5.3.5.5 Scientific/academic salaries
DFF may provide funding for salary for scientific/academic participants in the project. These participants may be researchers, who are already employed during the project period, whether it is on a
temporary or a permanent basis, as well as researchers who are not already employed for the project period in question.

DFF requires that salaries must be calculated according to the provisions, which apply to scientific staff in the collective agreement between the Danish Confederation of Professional Associations (AC) and the Danish Ministry of Finance. Scientific/academic participants, whose salaries are paid for by DFF, are covered by the employment structure for scientific/academic staff at institutions of higher education, or by the employment structure for scientific/academic staff performing research at sector research institutions.

Thus, salary expenses for named scientific participants can be calculated on the basis of the actual salary level the employee currently has or will be entitled to at his/her place of employment, including any anticipated increments during the project period. The calculation of salaries, which can be attached if relevant, should be documented as precisely as possible, with reference to current salary levels for researchers in employment at the time of application, or a salary calculation for researchers who are going to be appointed on the basis of funding from DFF. DFF therefore recommends that you contact the administering institution in order to get a salary calculation, or if you are already employed, to enclose a copy of your most recent salary statement. You must use salary expenses (salary, pension, ATP, holiday pay) for participants with permanent positions in the budget. Please note that you should not apply separately for vacation allowances for permanently employed scientific/academic participants. For employees on fixed-term employment contracts, DFF requires holiday pay from previous employments to be deducted from the salary budget for the scientific/academic participants.

Salary expenses for unnamed scientific/academic employees participating at postdoctoral level should normally be calculated based on the salary level for postdoctoral candidates/assistant professors, cf. the collective agreement between the Danish Confederation of Professional Associations (AC) and the Danish Ministry of Finance.

Salary overhead, see Section 5.3.5.10 must be calculated on the basis of the type of institution, which defrays and registers/pays the salary to a project participant.

5.3.5.6 Technical/administrative salaries
You may apply for funding to cover salaries for non-scientific assistants, including student assistants. In accordance with national regulations, you may not cover salary costs above the professional level that is necessary for carrying out the tasks required.

Salary overhead, see Section 5.3.5.10 must be calculated on the basis of the type of institution, which defrays and registers/pays the salary to a project participant.

5.3.5.7 Equipment (purchase or construction)
You may apply for funding to cover the purchase or construction of equipment, which is necessary in order to carry out the specific project. If you apply for funding to cover the purchase of equipment in excess of DKK 500,000, excluding overhead/administration expenses, you must be able to document the expenses, e.g. in the form of a quote, which must be attached as an appendix. After completion of the grant, funded equipment will become the property of the administrator or the institution/business that purchased the equipment per the grant documentation.

5.3.5.8 Operating expenses
You may apply for funding to cover all operating expenses directly attributable to the project, and which are relevant and necessary in order to carry out the project.
In the budget template you must specify the individual operating expenses, which add up to the total operating budget. Please provide detailed argumentation in connection with considerable operating expenses, accounting among other things for extent, price level, and relevance.

**Expenses which are expected to be covered by overhead**

DFF expects that expenses for books, normal work PCs, general software, and other general work tools are covered by the institutions’ overhead. Therefore, DFF does not offer support for these kinds of expenses. Moreover, DFF expects that access to and use of equipment, facilities, databases, etc., which are already available at the host institutions, will be made available at no extra cost for research projects, which the institutions agree to host. Unless you can document that special circumstances apply, DFF will not offer support for these kinds of expenses.

**Education rates**

As part of your operating expenses, you may apply for annual education rates (“uddannelsestakster”) in relation to any research education required in conjunction with PhD scholarships financed by DFF. In accordance with an agreement between the research council system and Universities Denmark, DFF uses special education rates. These rates are lower than the guideline for annual education rates listed in the Finance Act in connection with funding to the Danish universities. However, the employing or host institution may in turn give PhD students funded by DFF, tasks corresponding to 840 hours in a 3-year PhD course of study. For PhD students enrolled at Danish universities you may apply for education rates per full project year (max 3 years) corresponding to DKK 50,000 (Humanities and Social Sciences) or DKK 80,000 (Natural Sciences, Medical Sciences and Technical Sciences). This amount will be at the disposal of the host institution, and covers all salary expenses in relation to PhD supervision as well.

**Travel and subsistence expenses**

You may apply for funding to cover travel and subsistence expenses. The purpose is to cover actual additional costs related to official journeys. The maximum rates are listed in the Government circular on the official journey agreement (“Statens Cirkulære om Tjenesterejseaftalen”) and the associated circular on adjustment of rates (“Cirkulære om Satsregulering”). You can find the relevant agreements and rates at [www.oes.dk](http://www.oes.dk). If, during a stay abroad, you remain employed at a Danish state-owned research institution, DFF recommends that you find out whether you are covered by state self-insurance and therefore do not need to take out your own personal insurance.

DFF expects that you have checked the real costs of the stay and are able to justify the items of expenditure, e.g. for transport, expected price of rental accommodation, and other living expenses. You may apply for the following:

- Reimbursement of transport expenses. However, expenses for local transportation during the stay abroad, will not be reimbursed
- Reimbursement of overnight stay expenses
- Hourly and daily allowances to cover additional expenses for meals, etc., to the extent that the hourly and daily allowances do not exceed the actual additional expenses.

**Open Access (not funded)**

DFF does not fund expenses associated with Open Access publishing. You can read more about Open Access at [www.ufm.dk](http://www.ufm.dk).

**Overhead for operating expenses**

The overhead is allocated to the institution defraying and registering the expenses for an operating item, based on the applicable rate for the type of institution in question.
5.3.5.9 Particular conditions for private enterprises

DFF funding to private enterprises must be allocated in accordance with EU regulations for state support (for further information please see "Statsstøttehåndbogen"). As a general rule, DFF awards grants to private enterprises as so-called de minimis aid, cf. European Commission regulation (EU) No. 1407/2013 of 18 December 2013 on the application of articles 107 and 108 of the Treaty on the Functioning of the European Union to de minimis aid as published in the Official Journal of the European Union on 24 December 2013. The recipient enterprise may receive a maximum of EUR 200,000 in de minimis aid in a 3-year period. If the applicant is an enterprise or part of the funding is to be passed on by the applicant to a participant in the form of an enterprise, a declaration of de minimis aid must be completed, signed and attached as an appendix to the application.

More details can be found at ec.europa.eu, where the new de minimis regulation and below regulation no. 651/2014 of 17 June 2014 have been published.

If the grant you have applied for is going to exceed the financial framework of the de minimis aid Regulation, it may be handled according to Chapter 1 (definitions in Article 1-12) and Article 25 of the EU’s general block exemption regulation (EU Commission Regulation (EC) No. 651/2014 dated 17 June 2014 on the compatibility of certain categories of aid with the common market, in application of Articles 107 and 108 of the Treaty).

5.3.5.10 Overhead/administration expenses

DFF grants overhead/administration expenses to cover indirect costs incurred in connection with carrying out the project, but which are not directly attributable to the specific project. This could include e.g. joint expenses to cover rent, premises, administration, etc.

Overhead/administration expenses are calculated as a fixed percentage of the grant amount that goes towards the project’s direct expenses. DFF grants overhead/administration expenses according to the following rates:

<table>
<thead>
<tr>
<th>Institution type</th>
<th>Overhead</th>
</tr>
</thead>
<tbody>
<tr>
<td>Danish institutions (including Danish universities and sector research institutes) which are subject to the rules regarding grant-funded research activities in the Danish Ministry of Finance's budget guidelines, and which are authorised to carry out grant-funded research activities.</td>
<td>44%</td>
</tr>
<tr>
<td>GTS - Advanced Technology Group Institutes (GTS institutes)</td>
<td>20%</td>
</tr>
<tr>
<td>Danish institutions that meet the following criteria:</td>
<td>20%</td>
</tr>
<tr>
<td>• receive and are expected to continue to receive a fixed state subsidy of minimum 25 % (measured in relation to the total annual turnover) for covering operating expenses</td>
<td></td>
</tr>
<tr>
<td>• are non-profit institutions which do not seek to generate profit, and where any profit may not be distributed among the owners</td>
<td></td>
</tr>
<tr>
<td>• carrying out research must be a central purpose</td>
<td></td>
</tr>
<tr>
<td>Public hospitals in Denmark, on Greenland and the Faroe Islands</td>
<td>3.1%</td>
</tr>
<tr>
<td>State-recognised Danish museums (cf. the Danish Museum Act) and public museums in Greenland and on the Faroe Islands</td>
<td>3.1%</td>
</tr>
<tr>
<td>All other Danish and foreign institutions and companies</td>
<td>0%</td>
</tr>
</tbody>
</table>

5.3.5.11 The principle for calculating differentiated overhead/administration expenses

If your DFF application concerns activities that involve funding of various institutions with different legal status, cf. the table above, it is necessary to calculate a differentiated overhead for each institution.

For salary expenses, overhead/administration expenses must be calculated on the basis of the institution or business that defrays and registers the salary expenses. As such, it is not crucial if the research activity is actually taking place at the institution or enterprise in question. Nor is the principal place of employment of a person, or where he/she typically works most hours a decisive factor. If a person...
is employed by several institutions, these institutions must agree on how the project hours are to be distributed as working hours among them. Each institution will then have to include the salary expenses for its share of the project working hours in the budget. The same principle applies to the division of equipment and operating expenses. The overhead is allocated to the institution(s) defraying and registering the expenses for an operating item, based on the applicable rate for the type of institution in question, cf. the above table.

5.3.6 Budget confirmation

DFF funding is granted under the condition, that the project’s budget information in the application is approved, signed, and stamped by the management of the administering institution and signed by the applicant. The administering institution is defined as the unit, which is responsible for the finance and personnel administration with regard to the project’s/applicant’s expenses during the project period, and ensures administrative legality in connection with terms of employment, accounts, etc. Stamps and signatures should be provided in the "DFF budget confirmation" template (the appendix must be uploaded to the application as a PDF file). You can find the template on the www.dff.dk/en/application/forms-for-application.

6 HOW IS THE APPLICATION PROCESSED AND ASSESSED?

6.1 REQUIREMENTS FOR YOUR APPLICATION TO BE GIVEN ACTIVE CONSIDERATION

If the application does not meet the requirements listed below, it can be rejected without prior active consideration, cf. § 4 and § 5 of the Executive Order no. 1154 of 16 October 2017 on the Functioning of grants under Independent Research Fund Denmark.

• The application must be submitted via e-grant (www.e-grant.dk).
• The application must be received before the application deadline expires.
• The application must be submitted for one of DFF’s funding instruments.
• The application must be written in the language specified (see Section 5.1.1).
• The application must include a project description written in the DFF project description template (see Section 5.3.1).
• The application must include the applicant’s CV (see Section 5.3.2).
• The application must include the applicant’s list of publications (see Section 5.3.4).
• The application must include a budget completed in the budget template relevant to the funding instrument (www.e-grant.dk).
• The total amount applied for must observe any upper and lower limits that apply to the instrument in question.
• The applicant must have at least a PhD degree or equivalent qualifications

If your application fulfils the above requirements, it will be submitted for active consideration by DFF on the basis of the submitted material. This means that after the application deadline and during the processing of the application, DFF will not request further information from you, irrespective of whether your application is incomplete in relation to the requirements listed under each funding instrument in this Call for Proposals. It also means that DFF will not accept any supplementary application material after the application deadline.
6.2 HOW TO APPLY FOR MORE INSTRUMENTS AND MORE THEMATIC RESEARCH AREAS

If you wish to apply for more funding instruments and/or more thematic research areas, you must submit a separate, complete application for each instrument or each of the thematic research areas.

6.3 INDEPENDENT RESEARCH FUND DENMARK’S PROCESSING PROCEDURES

All members of expert committees/council will be involved in the assessment of all applications. Members, who are deemed disqualified in relation to a particular application, will not participate in the processing of that application. Regulations for disqualifications can be found in § 2 of the Executive Order no. 1154 of 16 October 2017 on the Functioning of grants under Independent Research Fund Denmark.

Your application will be processed in the following way:

The different research themes will be processed in the following expert committees and councils:

<table>
<thead>
<tr>
<th>RESEARCH THEME</th>
<th>EXPERT GROUP/COUNCIL</th>
</tr>
</thead>
<tbody>
<tr>
<td>Green Transition</td>
<td>DFF</td>
</tr>
<tr>
<td>Effects of Early Intervention</td>
<td>DFF</td>
</tr>
<tr>
<td>Work on Development of Economic Modelling Principles</td>
<td>DFF</td>
</tr>
</tbody>
</table>

You can find an overview of the individual expert group/council members on the DFF website.

DFF always carries out an external review for all applications where:

• An expert committee or council member, who is going to evaluate the application, is an applicant or scientific participant in an application, whose budget exceeds DKK 1 million, excluding overhead or
• The committee or council is deemed disqualified, or for other reasons does not possess the necessary scientific expertise to consider the application.

Applications for external review will be submitted to an individual external reviewer. If your application has been submitted for external review, you will always receive a copy of the review to enable you to provide comments (consultation procedure). DFF uses external reviews as an extension of the basis for the assessment of the expert committee or council and the reviewer’s function is solely recommendatory. The final decision rests with the expert committee or council, and is based on the criteria described in the call and prioritisation of the overall field of applicants.

In the e-grant form you may state if there is a researcher, you would rather is not involved in the external review of your application. In such cases, you must provide exact contact information for the researcher in question, so that it will be possible to identify the researcher, and briefly explain why he/she should not review your application.

6.4 WHEN AND HOW WILL YOU BE NOTIFIED OF DFF’S DECISION?

Applications will be processed at meetings in October 2020. Approximately a week after the expert committees or the council reached their decision, you will receive a short message, informing you whether your application was successful or not.
Independent Research Fund Denmark publishes a list of applicants, who have been awarded a grant, approximately three weeks after the expert committees or council have reached a decision. Details about applicants who have not been awarded funding will only be published to the extent that someone requests a right of access to documents under the Danish Access to Public Administration Files Act, e.g. in the form of lists of applicants and the projects for which they have applied (i.e. names of applicants and project titles). Applicants should therefore ensure that the title of the application does not contain information about confidential research activities.

Applicants will receive a letter from DFF through the e-grant system 1-3 months after a decision by the relevant expert committee or council has been reached. Rejection notices will contain a brief elaboration on the reasons for the decision.

### YOUR RESPONSIBILITY AS AN APPLICANT

When using the DFF e-grant application portal, it is your responsibility to choose the correct application form and ensure that the information provided is correct. You are also responsible for ensuring that the contents of the appendices are correct, and that the appendices have been attached to the application. Moreover, it is your responsibility that the application has been submitted by the deadline.

This call lists the specific types of formal shortcomings in Section 6 ‘How is the application processed and assessed?’, which will result in an administrative rejection of applications. It is your responsibility to ensure that you fulfil all the formal requirements listed in the call, in order for your application to be submitted for consideration by the relevant expert committee or council.

You are obliged to inform DFF if significant prerequisites for carrying out the project are no longer met, or **if you are awarded full or partial funding for your project from other sources. If so, you are obliged to inform DFF within 14 days.**

Funding may be in the form of financing from other sources.

Partial funding may include cases, where you have submitted an application to other funds, with a content not entirely the same as the project you applied for to DFF, but where there is an overlap in the work packages or operating expenses, and equipment, for which you applied.

DFF may require you to submit the grant letter from and the application to the fund from which you received a grant as documentation, in order for DFF to decide whether there is an overlap in the topics of the two projects, and to decide which budget items to cut.

### 7.1 TECHNICAL DISCLAIMER

The Ministry of Higher Education and Science has an obligation to inform of any errors that make the e-grant system inaccessible, affecting the applicant’s possibility of submitting applications within a given deadline. Such technical issues will be announced on [www.ufm.dk](http://www.ufm.dk).

In particularly serious cases, the Ministry of Higher Education and Science may extend the application deadline for all relevant applicants. This will also be announced on the website.

The Ministry of Higher Education and Science is not liable for any incorrect information due to software errors, calculation errors, transmission errors and similar errors, just as the ministry will not be held liable for any claims for damages due to incorrect use of the e-grant system.
7.2 THE DANISH OPEN ADMINISTRATION ACT AND THE DANISH PUBLIC ADMINISTRATION ACT
The Danish Open Administration Act (Act No. 606 of 12 June 2013, which entered into force on 1 January 2014) also known as offentlighedsloven, provides you with certain rights, just as it secures citizens in Denmark various rights in relation to public authorities’ duty of disclosure in connection with administrative procedures. Thus, the material you submit to the Ministry of Higher Education and Science is as a whole covered by the regulations of the Danish Open Administration Act, e.g. in relation to the right of access to records. Please also see the Danish Public Administration Act (forvaltningsloven) (Consolidating Act no. 433 of 22 April 2014).

7.3 DATA PROTECTION ACT
Information in the application will be registered in e-grant. You have upon request the right to be informed about changed and deleted personal data about you, which DFF has registered and stored, cf. The Danish Data Protection Act (Act no. 419 of 31 April 2000, with later amendments) and the EU Regulation on data protection. Information given to the Secretariat will be transferred to Rigarkivet, according to Danish Archive regulation (arkivloven) and regulation for Statens Arkiver.

It is not possible to make corrections to the contents of your application after you have submitted it, other than corrections in relation to personal information.

7.4 AUTHORITIES’ RIGHT TO REQUEST OTHER INFORMATION
DFF reserves the right to obtain information on any previous and current applications you have submitted to Independent Research Fund Denmark, Innovation Fund Denmark and/or the Ministry of Higher Education and Science. Such information may be used in connection with the processing of your application, to the extent it is deemed relevant to the assessment of the application in question.

7.5 PUBLICATION
If you are awarded funding, in full or in part, your name and any project participants’ names, as well as details about the venue, title, and duration of the project, any key figures for the grant, and the size of the grant, will be published in the Danish Research Database (www.forskningsdatabasen.dk), and appear on DFF’s overview of funded projects. Furthermore, the popularised scientific description of the project may also be published on these two sites.

8 SUPPORT FOR YOUR APPLICATION
8.1 QUESTIONS ABOUT THE APPLICATION PROCEDURE
Independent Research Fund Denmark’s secretariat can provide guidance by telephone or in writing on the administrative and formal issues regarding this call and the application procedures. You may contact the DFF secretariat by telephone at +45 7231 8200 between 10 am and 2 pm on weekdays or by email: dff-opslag@ufm.dk.

On DFF’s website you can find answers to the most frequently asked questions: www.dff.dk/en/application/questions-answers.

The secretariat unfortunately cannot provide guidance on scientific issues. DFF recommends that you contact your local research support unit instead and use peer feedback.
8.2 TECHNICAL QUESTIONS (E-GRANT)
If you require help with using the e-grant system, please find more information here: [www.ufm.dk/forskningsog-innovation/tilskud-til-forskningsog-innovation/e-ansogningssystemer](http://www.ufm.dk/forskningsog-innovation/tilskud-til-forskningsog-innovation/e-ansogningssystemer).
If you have technical queries, you can contact the e-grant support by telephone at +45 3392 9190 between 9 am and 12 noon on weekdays or by email: support.e-grant@ufm.dk

8.3 QUESTIONS ABOUT EXISTING GRANTS
If you have queries regarding an existing grant from DFF, you should contact the Administration and Grants Unit in the Danish Agency for Institutions and Educational Grants, which manages the administration of grants from DFF. You may contact the unit by telephone at +45 3392 9200 between 9am and 12 noon on weekdays or by email: bevilling@ufm.dk. On the unit’s website, you can find answers to the most frequently asked questions regarding grants: [www.ufm.dk/en/research-and-innovation/funding-programmes-for-research-and-innovation/administration-of-grants?set_language=en&cl=en](http://www.ufm.dk/en/research-and-innovation/funding-programmes-for-research-and-innovation/administration-of-grants?set_language=en&cl=en)
